

THE THOMAS AVELING SCHOOL

SCIENCE DEPARTMENT

The Science department at Thomas Aveling is extremely welcoming, with a very vibrant team. The members of the department work well together, supporting the students and one another. The department has grown from strength to strength over the years with GCSE results continually improving.

The team provide a range of varied and relevant activities for our students at Thomas Aveling. Teaching and learning is a high priority within the department and lessons are varied and challenging for our students.

The department are constantly looking for new ideas to engage students, staff have been trained in the use of the Interactive white board and many new technologies are constantly being provided and used in lessons.

The students at Thomas Aveling School enjoy practical work and we are looking for a new addition to the team who has new ideas of how to relate Science to the real world. We seek to form new links with outside agencies to make Science real and our students benefit from speakers and theatre groups joining them in the department.

The Science department aims to prepare our students for living and working in a fast developing scientific society, leading onto further education if they desire and we are looking for a new member of staff who will help install these ethics in our students.

We are committed in our drive to improve standards still further. We are ambitious for our students and have introduced separate sciences post 16 so that they are able to further their studies with us.
