

In Geography we ask questions and seek answers about the physical and human environments, at a range of scales from the local area to the international. Geography develops our knowledge of places, an understanding of maps, and a range of investigative and problem-solving skills that will be of value later in life. Geography aims to create awareness for understanding and resolving issues about the environment and sustainable development. As students study Geography, they encounter different societies and cultures and, in doing so, learn how nations rely on each other.

In Key Stage 3 we look at Geography within specific themes. The topics covered in year 7 and 8 are listed below.

| **Year 7**

- Map skills.
- Superpowers.
- Taking care of the planet
- Conflict and crime
- California and Las Vegas
- Hot and cold places
- Australia

| **Year 8**

- Tourism.
- Rich world, poor world.
- Japan
- Mexico
- Population
- Managing waste
- Italy
- Pole to Pole
